GENERAL INTRODUCTION

PROVENANCE

The papers were received in December 1995 and May 1998 from Lord Flowers and in April 1997 from the University of Manchester.

OUTLINE OF THE CAREER OF LORD FLOWERS

Brian Hilton Flowers was born in Blackburn, Lancashire on 13 September 1924, although his family moved to Swansea, Wales in 1932. He attended Bishop Gore Grammar School, Swansea and was awarded a State Scholarship to Trinity College, Cambridge to read mathematics. However, Flowers was then offered a State Bursary to take physics and electronics at Gonville and Caius College, Cambridge, in order to assist the war effort. This guaranteed him two years of study before call-up, rather than one. At Gonville and Caius Flowers won an Exhibition and graduated with a wartime degree after two years. In September 1944 he crossed the Atlantic to join the Anglo-Canadian Atomic Energy Project in Canada, working initially at the University of Montreal until moving to Chalk River, Ontario in 1945.

Flowers returned to England in the summer of 1946 and began work at the Atomic Energy Research Establishment, Harwell, where he joined O.R. Frisch's group in the Nuclear Physics Division. His work during this period included measuring the thermal cross-section of tritium and devising a method of measuring the photodisintegration of the deuteron. In 1948 Flowers transferred to the Theoretical Physics Division at Harwell where he undertook work on nuclear reactions under M.H.L. Pryce. In 1950 Flowers was granted study leave to carry out research under R.E. Peierls at the Department of Mathematical Physics, University of Birmingham. During the next two years he worked largely on problems of nuclear structure relating to the nuclear shell model, in collaboration with A.R. Edmonds. His work during this period was the basis of his successful submission to the University of Birmingham for a D.Sc. in 1953.

In the autumn of 1952 Flowers returned to Harwell and was soon appointed Head of the Theoretical Physics Division in succession to K.E.J. Fuchs. He undertook to reconstruct the Division to make it more like a university department, whilst continuing with his own research in collaboration with J.P. Elliott. In 1958 Flowers was appointed Chief Research Scientist but decided in the same year to return to academic life at the University of Manchester, firstly as Professor of Theoretical Physics and then from 1961 as Langworthy Professor of Physics and Head of Department. At Manchester Flowers took on undergraduate teaching responsibilities and some of his lectures formed the basis of his book *Properties of Matter* published in 1970 (with E. Mendoza).

In 1967 Flowers took unpaid leave of absence from the University of Manchester and moved into scientific administration by accepting appointment for a term of five years as Chairman of the Science Research Council (SRC). During that period his achievements as Chairman included ensuring United Kingdom participation in the 300 GeV project at CERN and the SRC's establishment and development of the Engineering Board to sponsor and encourage engineering. He also succeeded in raising the SRC's public profile. In 1972 he agreed to a second term of office as Chairman, this time for three years, and resigned the Langworthy Professorship at Manchester. Almost immediately, however, he was offered and accepted the position of Rector of Imperial College of Science and Technology, London.

Flowers took up his duties as Rector of Imperial College in 1973 and in the same year was also appointed Chairman of the Royal Commission on Environmental Pollution, a position he held until 1976. The 4th, 5th and 6th Reports of the Royal Commission were published during his chairmanship and proved influential, with many of their recommendations subsequently accepted by Government. Flowers continued at Rector of Imperial College until 1985, when he was appointed as Vice-Chancellor of the University of London. Flowers retired in 1990, although he continued to play a very active part in public life and in 1994 was appointed Chancellor of the University of Manchester.

Flowers contributed articles to scientific periodicals about the structure of the atomic nucleus, nuclear reactions, science policy, energy and the environment. He published the books *Properties of Matter*, with E. Mendoza in 1970 and *An Introduction to Numerical Methods in C++* in 1995.

Flowers played an active role in public life from the 1960s, frequently acting as chairman of committees and other bodies. These include the Computer Board for Universities and Research Councils, 1966-1970, the Standing Commission on Energy and the Environment, 1978-1981, the Committee of Vice-Chancellors and Principals, 1983-1985, the House of Lords Select Committee on Science and Technology, 1989-1993 and the Nuffield Foundation, 1987-1998. Flowers served on the Advisory Council on Scientific Policy, 1962-1964 and the Council for Scientific Policy, 1965-1967, and was also President of several societies and organisations including the Institute of Physics, 1972-

1974, the European Science Foundation, 1974-1980 and the Parliamentary and Scientific Committee, 1993-1997.

Flowers was a founder member of the Social Democratic Party in 1981, having been persuaded to join by Shirley Williams MP. As a life peer he served, in his spare time, as a front bench spokesman on issues relating to science, education, energy and the environment until he decided in 1989 to return to the cross benches.

Flowers was accorded many honours and awards for his contributions to both science and public life. He was elected to the Fellowship of the Royal Society in 1961 and awarded the Rutherford Medal by the Institute of Physics and Physical Society in 1968. In the following year he received a knighthood and this was followed in 1979 with a life peerage. Flowers's achievements were also honoured by the French Government in 1975 and 1981 with the titles of Chevalier de la Légion d'Honneur and Officier de la Legion d'Honneur respectively.

DESCRIPTION OF THE COLLECTION

The material is presented in the order given in the list of contents. It covers the period from the early 1940s to 1998.

Section A, Biographical, documents most stages of Flowers's career from 1958 to 1990, including papers relating to his various appointments and the honours and awards he received. His undergraduate studies at Cambridge are also represented, through five notebooks from the early 1940s. There is material reflecting his concerns for science education and research, as well as material relating to his wider political interests such as the Suez Crisis of 1956, the entry of Britain into the Common Market in 1971 and his resignation from the Social Democratic Party in 1989. The section also contains some family material, photographs of Flowers with colleagues at various functions and a large collection of press cuttings illustrating his public profile over the period 1969 to 1981.

Section B, University of Manchester, covers the career of Flowers at that institution from 1960 to 1967 when he was Professor of Theoretical Physics (1958-1961) and Langworthy Professor of Physics (1961-1967) and from 1994 to 1997 when he was Chancellor. There is correspondence and papers relating to University Grants Committee visits, the Department of Physics Steering Committee, the establishment of the Honours School of Liberal Studies in Science, and the office of Chancellor of the University of Manchester.

Section C, Research, consists of a notebook on pulse chambers from the late 1940s and a copy of Flowers's D.Sc. submission to the University of Birmingham in 1953.

Section D, Speeches, lectures and broadcasts, is substantial. Its principal component is a main sequence of invitation and public speeches and lectures covering the period 1946-1995. Flowers gave numerous speeches and lectures over the years especially during his Rectorship of Imperial College, London from 1973 to 1985 and these are well represented, as are his contributions to House of Lords debates from 1979 to 1995. There are also lecture courses which Flowers gave while a lecturer at University of Birmingham (1950-1952) and at the University of Manchester (1958-1967). There is some broadcast material for BBC radio over the period 1957 to 1983.

Section E, Publications, consists of a series of correspondence and drafts chiefly covering the late 1940s to early 1980s. As well as material relating to articles by Flowers and interviews about him there are also papers relating to his books *Properties of Matter* with E. Mendoza (John Wiley & Sons Ltd, 1970) and *An introduction to numerical methods in C++* (Clarendon Press, 1995) as well as two unpublished books from the 1950s entitled 'The Structure of Light Nuclei' and 'Group Theory and Nuclear Structure'. There is also editorial material from the 1970s and a large collection of offprints of Flowers's publications from the late 1940s to the 1990s.

Section F, Societies and organisations documents Flowers's involvement with numerous UK, overseas and international bodies over the period, 1957-1998. His interest in the policy-making and administration of higher education both at home and abroad is represented through papers relating to the Committee of Enquiry into the Organisation of the Academic Year, the Hong Kong University of Science and Technology, the Catching Up with European Higher Education Fund and the Hungarian Accreditation Committee. Flowers's association with the United Kingdom Atomic Energy Authority between 1958 and 1977 is well documented and there is also a considerable body of material relating to his chairmanship of the Computer Board for Universities and Research Councils, the National Physical Laboratory's Steering Committee, the House of Lords Select Committee for Science and Technology and the Nuffield Foundation. Political concerns are reflected through correspondence and papers relating to Pugwash Conferences for the period 1962-1967, while his continued interest and involvement in the affairs of Imperial College of Science and Technology, London and the University of London, following his retirement in 1990, are also well represented in this section.

Section G, Correspondence, includes an extensive sequence described by Flowers as 'personal correspondence', addressed to him in his various official capacities. The subject matter is broad, covering a wide range of professional issues and more personal matters relating to colleagues, friends and family. There is also a sequence of day files from 1990 to 1997. Other series of correspondence are those with J.W. Bray MP in 1966 and Lord Rothschild in the 1970s and 1980s. There is also a large sequence of references and recommendations.

There is also an index of correspondents.

ACKNOWLEDGEMENTS

We are very grateful to Lord Flowers for making his papers available for cataloguing and for his advice and encouragement.

SECTION B

UNIVERSITY OF MANCHESTER

B.1-B.29

Flowers was Professor of Theoretical Physics at the University of Manchester from 1958 to 1961 and Langworthy Professor of Physics from 1961. In 1967 Flowers took leave of absence to assume the chairmanship of the Science Research Council (SRC) and in October 1972 he resigned his position as Langworthy Professor. His professional association with the University of Manchester was renewed when he was elected Chancellor in December 1994 and installed as such in a ceremony on 5 May 1995.

The material in this section has been arranged chronologically, it covers the periods 1960 to 1967 and 1994 to 1997.

B.1-B.3 Visit of the University Grants Committee (UGC) to the University of Manchester, 14-16 February 1961.

Flowers was appointed as a representative of the University Senate to meet the UGC on the occasion of their visit.

Correspondence and papers relating to the visit, 1960-1961.

Softback notebook, *ca* 1947/1948.

'Theory of Pulse Chambers' inscribed on front cover. Contains manuscript notes, calculations, graphs, tables etc. Includes intercalated photograph of laboratory equipment.

'The notebook on pulse chambers was written for my own benefit. I was working on gridded pulse chambers at the time, and O R Frisch gave me some notes of his own on the subject. There was also some published stuff. I assembled what appeared relevant to my needs, working out a few things myself as I went along, although how much was original I can no longer guess. It was done while I was still in the Nuclear Physics Division in Harwell, around 1947-48.' (Lord Flowers, private communication, 10 April 1998).

D.1-D.476 INVITATION AND PUBLIC SPEECHES AND LECTURES 1946-1995

The main sequence of invitation and public speeches and lectures (D.1-D.469) covers the period 1946-1995. Flowers gave numerous speeches and lectures when he was Rector of Imperial College, London from 1973-1985 and these are well represented in the main sequence. A folder of selected lectures and speeches (D.470-D.476) compiled in September 1985, covers the period 1956-1965.

When it is not known where a particular speech or lecture was given this has been indicated in the text by '[?]'.
Arranged in chronological order.

D.1-D.469 Main sequence

D.470-D.476 Selected early speeches and lectures

D.1-D.469 Main sequence 1946-1995

D.1 Eleven typescript lists of lectures and speeches given by Flowers, 20pp, June 1946-July 1985.

Originally each list accompanied a boxfile of lectures and speeches to which it referred. The lists have been grouped together and the lectures and speeches in each boxfile amalgamated, with others found elsewhere in the papers, to form a continuous sequence.

Flowers frequently had his speeches and lectures in large print on approximately A5 format pages to aid his delivery of them to audiences. Where this is the case it has been indicated in the text.

D.528-D.572 Manchester lecture courses

D.477-D.527 Birmingham lecture course ca 1951-1959

D.477-D.527 Lecture course etc, Department of Mathematical Physics, University of Birmingham, ca 1951.

'Final Year Honours Physics/Postgraduate Quantum Mechanics Birmingham 1951/52 Harwell 1955/56 Harwell 1956/57 Manchester 1958/59'. Contents of folder so inscribed, divided into 50 for ease of reference.

The material consists of manuscript notes for a lecture course. In general Flowers has indicated the number and date of each lecture. He has numbered the pages 1-317 but there has been sub-numbering, and occasionally additional pages have been added.

D.477 3pp manuscript syllabus for quantum mechanics course, n.d.; 1p manuscript note of recommended books, n.d.

D.478-D.526 Lectures 1-[49].

The lecture titles given are those listed by Flowers in his syllabus for the course, see D.477.

D.478 1. 'Classical mechanics', 6pp.

D.479 2. 'Wave nature of electrons', 'Schrödinger's equation', 7pp.

1947/1948-1982

Arranged in chronological order.

E.1

'Theory of ionization chambers'. Contents of folder so inscribed, *ca* 1947/1948.

9pp incomplete typescript draft entitled 'The Theory of Pulse Chambers'; 1p manuscript graph; 3pp incomplete manuscript notes.

In a private communication of 10 April 1998 Lord Flowers indicated that he wrote an article on the theory of pulse chambers in the period 1947-1948 but that it was never published. The material above may relate to this.

E.2-E.6

'Unfinished Book. Group Theory and Nuclear Structure'. Contents of boxfile so inscribed. *ca* 1952-1954.

In June 1952 the North-Holland Publishing Co., Amsterdam, wrote to Flowers inviting him to participate in the writing of a book on group theory as part of their series Monographs on Theoretical and Applied Physics. Flowers was to co-author the book with A.R. Edmonds.

E.2

'Book'. Contents of folder so inscribed, 1952-1954, n.d.

Correspondence etc *re* negotiations with North-Holland Publishing Co., N.F. Mott and Clarendon Press; 1p typescript abstract entitled 'Group Theory and Nuclear Spectra', June-December 1952.

Correspondence with A.R. Edmonds *re* book; 10pp typescript notes, and 4pp typescript scheme of book, October 1952-May 1954. 15pp typescript draft scheme for the book entitled 'Group Theory and Nuclear Spectra', n.d.

E.3

'Chapter I. Group Theory and Nuclear Structure'. Contents of folder so inscribed, n.d.

1p typescript entitled 'Notation'; 19pp manuscript draft entitled 'Chapter I. Non-Relativistic Quantum Mechanics'.

E.4

'Chapter II. The Concepts of Groups & Rings'. Contents of folder so inscribed.

23pp manuscript draft and later 27pp annotated typescript draft, n.d.

Publications

- E.5 'Chapter III. Representation Theory'. Contents of folder so inscribed.
14pp manuscript draft and later 16pp typescript draft, n.d.
- E.6 'Chapter IV. the Group of the Hamiltonian'. Contents of folder so inscribed.
7pp typescript draft entitled 'Chapter IV' and annotated by Flowers 'A R E's rough draft' with attached 4pp manuscript draft, in the hand of A.R. Edmonds, entitled 'Ch IV. continued. Diagonalisation of the Energy Matrix'. n.d.
- E.7-E.17 'Unfinished Book, The Structure of Light Nuclei'. Contents of boxfile so inscribed. The contents were further contained within a folder entitled 'The Structure of Light Nuclei' (retained at E.7). Latest bibliographical reference 1958.
- E.7 'The Structure of Light Nuclei', Atomic Energy Research Establishment (AERE), Harwell issue folder so inscribed enclosing E.8-E.17. The contents were subdivided by Flowers into a bundle consisting of nine manuscript draft chapters of the book (E.8-E.13) and 2 folders with further draft material (E.14-E.16 and E.17).
- E.8-E.13 Bundle consisting of manuscript drafts of chapters 1-9, with annotations, divided into six for ease of reference.
- E.8 'Chapter I. Introduction', 14pp; 'Chapter II. Nuclear Forces and the Many-Body Problem', 22pp.
- E.9 'Chapter III. The Simple Shell Model', 30pp+graph.
- E.10 'Chapter IV. Refinements of the Simple Shell Model', 40pp.
- E.11 'Chapters V. Angular Momentum and Tensor Operators', 20pp; 'Chapter VI. The Symmetries of Nuclear States', 21pp.

F.1 ADVISORY COUNCIL ON SCIENCE AND TECHNOLOGY 1987

Flowers was Chairman of a Working Party, originally set up by the Advisory Council on Applied Research and Development (ACARD) to examine the industrial implications of the future UK nuclear programme. This work continued after ACARD was reconstituted as the Advisory Council on Science and Technology (ACOST) in August 1987.

F.2-F.28 CATCHING UP WITH EUROPEAN HIGHER EDUCATION FUND and HUNGARIAN ACCREDITATION COMMITTEE 1991-1995

F.2-F.19 'Hungarian Correspondence'

F.20-F.22 Meetings

F.23-F.28 Background material

Flowers was Honorary President of the Advisory Board of the Catching Up with European Higher Education Fund (CEF), 1991-1993. In 1993 the CEF was reformed and he served as a member of the Board of Trustees until the following year. The CEF's purpose was 'to award supplementary grants to enable selected university activities in Hungary to develop in modern directions' (Lord Flowers, private communication, 1 May 1998).

Flowers served on the Advisory Board of the Hungarian Accreditation Committee (HAC), 1993-1994. HAC's primary purpose was to oversee the establishment and accreditation of Ph.D. programmes at Hungarian universities.

The correspondence about Flowers's association with these two separate organisations was kept together because of the common link to Hungarian higher education.

F.2-F.19 'Hungarian Correspondence' 1991-1995

Correspondence relating to Flowers's involvement with both the Catching Up with European Higher Education Fund and the Hungarian Accreditation Committee was kept together in a file inscribed 'Hungarian Correspondence'. This correspondence has been divided into eighteen folders for ease of reference.

UNIVERSITY GRANTS COMMITTEE (UGC)

1965-1966

In 1965 Flowers was appointed Chairman of a Working Group set up by the University Grants Committee and the Council for Scientific Policy, with the terms of reference:

'To assess the probable computer needs, during the next five years, of users in Universities and civil research establishments receiving support from Government funds'.

The report of the Working Group chaired by Flowers recommended that it should be succeeded by a 'suitably constituted permanent body'. Consequently the Computer Board for Universities and Research Councils was created and Flowers accepted appointment as its first Chairman in June 1966.

An Interim Computer Panel was established by the University Grants Committee, with Sir Willis Jackson as Chairman. Its purpose was to make recommendations on computers for universities where urgent action arising from the report of the Working Group could not be delayed until the creation of the Computer Board.

The material listed below was found together. It largely consists of correspondence and papers for meetings relating to the Interim Computer Panel.

PERSONAL CORRESPONDENCE

1979-1997

Contents of Flowers's correspondence files inscribed 'Personal'.

The personal correspondence is the main sequence of incoming correspondence in the collection with copies of replies by Flowers. The correspondence is addressed to him in various capacities so the subject matter is broad, covering a wide range of professional issues and more personal matters relating to his colleagues, friends, and family.

Correspondence relating to the same subject was generally grouped into bundles within each of Flowers's files. These bundles were arranged in chronological order by the latest date within each bundle. As a result there is frequently an overlap in date span between bundles. The correspondence in the files has been subdivided into folders for ease of reference without any alteration to the original arrangement. As a result this date overlap is reflected in the catalogue entries.
