**F.312-F.345 Board of Visitors / Science Research Council (SRC)
RGO Committee 1935-1973**

McCrea was a longterm member of the Board of Visitors / SRC Committee.

In a letter of 21 June 1983 to the President of the Royal Society (F.424) McCrea states that 'during most of the years about 1943-1965' he was on the old Board of Visitors and when the SRC took over served as first Chairman of their RGO Committee 1965-1971.

The reports of the Astronomer Royal at F.312-E.315 predate McCrea's membership of the Board of Visitors and are presented here for general information.

McCrea was particularly in demand on the occasion of the 1979 centenary. He wrote an article on 'Albert Einstein, Physicist' for *Interdisciplinary Science Reviews*, December 1978 which was also published in German translation in *Naturwissenschaftliche Rundschau* 1979. He also published an article on 'Cosmology after Einstein' in the *New Scientist*, vol. 82, no. 1145, 8 March 1979.

He was invited to contribute to a semi-popular book on general relativity published to mark the Einstein centenary (Editor G.E. Tauber, Tel-Aviv University). McCrea's contribution was titled 'Cosmology sixty years on'. He was invited to contribute to a commemorative book 'with an article on the evolution and the preset [sic] status of cosmological studies first originated by Einstein's scientific work'. Editor A.Y. Özemre, University of Istanbul. He was invited to contribute to a book entitled *Centenario di Einstein* in preparation under the patronage of the Accademia Nazionale dei Lincei.

He gave a talk at the 'Einstein Centenary Meeting 9 March 1979' on 'Einstein: Relations with the Royal Astronomical Society' which was published in *Q.Jl R. astr. Soc.* vol 20 (1979), 251-260. He also gave a talk to students at Oxford, 18 October 1979.

He organised the Royal Society's Einstein Centenary Review Exhibit and wrote the introduction to the exhibition booklet.
