SECTION J

VISITS AND CONFERENCES

J.1-J.1885

Salam was invited to attend a huge number of conferences, meetings and seminars all around the world. The material in this section relates to those invitations that Salam accepted and to those he did not. The diversity of the topics covered by the conferences Salam chose to attend, ranging from high energy physics and science education to alternative energy sources and religious freedom, reflects the breadth of his interests and activities. Salam's continuing participation in physics research and debate at the highest levels, the concern he felt about the arms race and the proliferation of nuclear weapons and his lifelong commitment to development are all represented in this section. Salam's enduring links with the Third World and particularly with Pakistan were strengthened during his regular travels abroad.

The bulk of the material is presented in two main sequences following the arrangement of Salam's office at ICTP. These main sequences do not contain material earlier than the mid 1960s. For papers and correspondence relating to several conferences attended by Salam in the 1950s and early 1960s see J.1791-J.1814.

Documentation of events at which Salam was present often includes drafts of his own contributions in the form of an address or lecture notes and there is some overlap with material in the lectures and broadcasts section (Section F).

For additional material relating to UNESCO conferences and meetings, some of which appears in this section, see G.63-G.70.

INVITATIONS ACCEPTED

1965-1997

The presentation of this sub-section is chronological. The sub-section includes some early material that appears to relate to invitations which Salam either declined or does not appear to have accepted. This material remains in this sub-section both to preserve the order in which it was originally filed and because the final outcome of the invitation is not clear. Salam continued to receive invitations long after ill-health prevented him from travelling abroad. The final item in this section is an early announcement of an event which actually took place after Salam's death in November 1996.

Where no date is given for a proposed visit or invitation, material has been arranged according to the date of the earliest piece of correspondence.

INVITATIONS NOT ACCEPTED

1969-1996

This sub-section contains material relating to invitations that Salam declined. It mainly comprises invitations with a (standard) response from Salam expressing regret at not being able to attend. Occasionally, however, Salam planned to attend a conference or undertake a visit but was prevented from doing so at a later date. In such cases, invitations are accompanied by further correspondence and papers concerning arrangements.

The sub-section is divided into two separate sequences reflecting distinct filing series. The first sequence is sorted chronologically. The second sequence is sorted alphabetically by country.
