

Catalogue of the papers and correspondence of

Robert Millner Shackleton FRS

(1909-2001)

by Timothy E. Powell and Peter Harper
NCUACS catalogue no. 158/1/08

Title: Catalogue of the papers and correspondence of Robert Millner
Shackleton FRS (1909-2001), geologist

Compiled by: Timothy E. Powell and Peter Harper

Description level: Fonds

Date of material: 1929-2007

Extent of material: 12 boxes + outsize maps

Deposited in: The Library, Geological Society of London

Reference code: GB 0378 LDGSL 1090

© 2008 National Cataloguing Unit for the Archives of Contemporary Scientists,
University of Bath.

NCUACS catalogue no. 158/1/08

The work of the National Cataloguing Unit for the
Archives of Contemporary Scientists in
the production of this catalogue is made possible
by the support of the Geological Society of London

NOT ALL THE MATERIAL IN THIS COLLECTION
MAY YET BE AVAILABLE FOR CONSULTATION.

GENERAL INTRODUCTION

PROVENANCE

The material was received for cataloguing from the Library of the Geological Society of London in August 2007.

OUTLINE OF THE CAREER OF ROBERT MILLNER SHACKLETON

Robert Millner Shackleton was born in Purley, Surrey, on 30 December 1909. He was educated at the Quakers' (Society of Friends) Sidcot School in Somerset and the University of Liverpool, graduating B.Sc. Geology with First Class Honours in 1930. He went on to research at Liverpool under P.G.H. Boswell on the geology of the Moel Hebog area of Snowdonia in North Wales (Ph.D. 1934), then won a Beit Fellowship at Imperial College London 1932-1934. In 1935 he was appointed Chief Geologist to Whitehall Exploration Ltd in Fiji but returned to Imperial College as Lecturer in Geology in 1936.

In 1940 Shackleton was appointed a geologist in the Mining and Geological Department of Kenya, as part of the wartime strategic planning programme. He surveyed widely throughout Kenya producing reports for the Geological Survey of Kenya on the areas of Malikisi, North Kavirondo, Nyeri, the Migori Gold Belt, and Nanyuki and Maralal. His studies extended into the geometry of the orogenic belts of East Africa and the volcanism that produced the Rift System. In 1942 the archaeologist Mary Leakey discovered prehistoric human artefacts at Olorgesailie, a lower Palaeolithic (Acheulean) site southwest of Nairobi. In the mid-1940s Mary and L.S.B. Leakey excavated the site and Shackleton collaborated with the investigations, preparing geological maps of the area around the Olorgesailie site and the area between Olorgesailie and Ngong.

Shackleton returned to Imperial College in 1945 and was offered a Professorship there. However, he thought the department too unmanageable and in 1948 returned to Liverpool as the Herdman Professor of Geology. In his time in the Herdman chair, he re-organised the Liverpool geology department and put it at the forefront of geological research in Britain. In 1962, in order to increase his opportunities for research in Africa, Shackleton became Professor of Geology in the University of Leeds and joined the staff of the Research Institute of African Geology (serving as Director from 1965 until retirement). For the year 1970-1971 Shackleton was Royal Society Leverhulme Visiting Professor of Geology at the Haile Selassie University, Addis Ababa, Ethiopia. He formally retired in

1975 but was Research Fellow at the Open University from 1977 until his death and remained very active in field geology.

Shackleton's influence on his profession was profound. His achievements were recognized by the award of the Silver Medal of the Liverpool Geological Society (1957) and the Murchison Medal of the Geological Society of London (1970), and his election to the Fellowship of the Royal Society (1971). His Royal Society citation recorded that he was:

'Well-known for his contributions to the study of crystalline rocks, more particularly of rock deformation and large scale tectonics. A versatile pioneer in investigation of the Caledonides of Wales and western Ireland, of Rift Valley vulcanicity and Pre-Cambrian tectonics. His papers and discussions have influenced much recent work in these fields in which he has trained many of the younger British workers.

Of particular importance have been his work on Tertiary volcanics in Kenya, his understanding of the Pre-Cambrian of eastern and central Africa and his accounts of Dalradian structures and deposits'.

Shackleton produced some 160 scientific papers and through encouragement of younger colleagues exerted a deep influence on several generations of geologists. He had an extremely wide knowledge of his subject, from the origins of the Earth to the evolution of man. Although his earlier work had focused on the British Isles, he developed a particular interest in the geology of East Africa. Shackleton initiated structural studies across orogenic belts in Tanzania-Zambia-Malawi (in the late 1960s), major studies across the Limpopo Belt and adjacent Archaean greenstone belts of Zimbabwe-Botswana-South Africa (in the 1970s) and projects across the orogenic systems of Egypt, Sudan and Kenya (in the early 1980s). Just prior to his death he was working on a detailed compilation of the Pre-Cambrian geology of East Africa. Shackleton's interests were global, however, and continuing research interests included the Pre-Cambrian geology of Arabia and the tectonics of the central and western Himalayas. At the age of 75 he led a pioneering Royal Society geological traverse across Tibet, in collaboration with the Academia Sinica, Beijing.

Shackleton died on 3 May 2001. He married three times and left five children (two sons and three daughters), including the distinguished geoscientist Professor Sir Nicholas Shackleton (1937-2006).

DESCRIPTION OF THE COLLECTION

Section A, Biographical, is very slight. It includes obituaries and a copy of the Royal Society Biographical Memoir of Shackleton.

Section B, Notebooks, includes the main numbered sequence of Shackleton's notebooks of geological fieldwork from 1929 to 1988. These record his work throughout the world, with particularly good coverage of Shackleton's research in Kenya in the 1940s, Ireland from the late 1940s onwards, Fiji in the 1950s, Scotland and North Wales from the 1950s, and southern and east Africa in the 1960s. The numbering is not chronological and some of the enumeration may date from after the notebook was used. The sequence is not complete, a number of notebooks were missing. There is also a sequence of numbered notebooks running from I to X, covering Shackleton's work in Fiji, November 1935-August 1936 as Chief Geologist to Whitehall Exploration Ltd. Unnumbered notebooks include a pocket notebook used by Shackleton to record his attendance, while still an undergraduate, at the 15th International Geological Congress held in Pretoria, South Africa, 1929, and a conference notebook for 'The Fourth IGCP 348 (The Mozambique and related belts) Field Meeting in Ethiopia and Eritrea March 15-25, 1996'.

Section C, Maps and photographs, is divided into four. The first subsection presents material documenting the geology of Moel Hebog, in North Wales. Shackleton's Ph.D. was on the geology of this area and he returned to Moel Hebog later in his career. Accordingly the material may have originated from a number of visits, although it certainly includes postgraduate research work. The second subsection, Kenya, includes the bulk of the maps. They principally cover Shackleton's surveying 1940-1945. He worked throughout Kenya producing reports for the Geological Survey of Kenya on the areas of Malikisi, North Kavirondo (1944), Nyeri (1945), Migori Gold Belt (1946), and Nanyuki and Maralal (1946). This subsection also includes maps of the Olorgesailie site and surrounding area. There are a few figures from the 1950s and later relating to his ongoing work in East Africa, particularly on the geology of the Rift Valley. Maps of Great Britain and Ireland comprise the third subsection. These are mostly Ordnance Survey six inch (1:2,500) and one inch (1:63,360) maps, annotated by Shackleton. The majority are of Scottish sites and appear to have been used from the 1930s to the 1950s. The section is completed by composite panoramic photographs from Tibet in the 1980s.

Section D, Tryweryn Dam Consultancy, documents Shackleton's service advising Liverpool Corporation on the geology of the site of the Llyn Celyn reservoir in Merionethshire, North Wales. In 1955 Liverpool Corporation announced its intention to build a reservoir near Bala to assure Liverpool's water supply. The plan was approved in 1956 and an enabling Act of Parliament was passed the following year. Despite an opposition campaign headed by Welsh Nationalists, the dam building went ahead and the reservoir was opened in October 1965. The material includes reports, Parliamentary proceedings and Shackleton's correspondence with J.H.T. Stilgoe, Water Engineer of Liverpool Corporation.

LOCATIONS OF OTHER MATERIAL

The British Geological Survey, Keyworth, Nottingham holds Shackleton's field slips from North Wales, and a little other material.

The Papers of Glynn Ll. Isaac, at the National Anthropological Archives, Smithsonian Institution, Washington D.C., USA, include Shackleton's original drawings and sections from Olorgesailie, Kenya.

For more information see A.3.

SECTION B	NOTEBOOKS, B.1-B.171	1929-1996, n.d.
------------------	-----------------------------	----------------------------

Nearly all the notebooks are labelled or inscribed on the title or spine. These titles are reproduced in the catalogue entries.

B.1-B.148	MAIN SEQUENCE
B.149-B.158	FIJI NOTEBOOKS
B.159-B.167	UN-NUMBERED NOTEBOOKS
B.168, B.169	S. MARCHANT'S NOTEBOOKS
B.170, B.171	INDEX

B.1-B.148	MAIN SEQUENCE	1929-1995
------------------	----------------------	------------------

This sequence of Shackleton's numbered field notebooks, running from 1 to 148, covers Shackleton's geological fieldwork from 1929 to 1988. The numbering is not chronological and some of the enumeration may date from after the notebook was used. The sequence is not complete, a number of notebooks were missing including 2-8, 11-13 and 70-72. It is hoped that these notebooks will be located so gaps have been left in the catalogue accordingly.

All are pocket-sized and most have hard covers. Many bear evidence of use in the field: water-stained pages, dirt marks, and general wear and tear. They contain field notes, cross-sections and sketches, maps, lists of specimens. There may also be the occasional portrait and landscape sketch. A note of title inscription (generally on spine or front cover) is given in the catalogue entries.

At B.170 is a card index box listing the notebooks and the geographical locations covered.

Dating in the notebooks cannot be relied upon. The day of the month and year do not always correspond and occasionally the decade is wrong, eg. [19]67 for [19]76 in B.115.

Notebooks, B.1-B.171

B.1	<p>'R.M.S. 1 Carnedds'</p> <p>Also includes notes on strata of Radstock district, Somerset; notes on N.L. Bowen's <i>Evolution of Igneous Rocks</i> and other notes on the literature. Used at the back for list of specimens 1-263.</p> <p>The Carnedds are a mountain group in Snowdonia. The range includes Moel Hebog, the subject of Shackleton's Ph.D. thesis.</p>	1929, 1930, n.d.
B.9	<p>'RMS 9 Kenya (1)'</p> <p>The notebook is also labelled 'Kenya 1946 Kariandusi Kinangop' and 'Kariandusi Kinangop I'.</p> <p>Work August-September.</p>	1946
B.10	<p>'RMS 10 Kenya (2)'</p> <p>The notebook is also labelled 'Kenya 1946 Kariandusi Kinangop II Nairobi-Cairo'.</p> <p>Work September.</p>	1946
B.14	<p>'RMS 14 Kenya (6)'</p>	1946
B.15	<p>'RMS 15 Kenya (Macalder)', and inside front cover 'Notebook RMS 15 (Kenya 7)' and 'Kenya Jan 1951 a) Notes on flight over Turkane b) Macalder Mi'</p> <p>Most of the notes are on Macalder Mine.</p>	1951-1952
B.17	<p>'RMS 17 Ireland'</p> <p>Work in County Wicklow.</p> <p>Observations start at '225' suggesting this continues work begun in notebook 16 (not found at time of cataloguing).</p>	N.d.
B.18	<p>'RMS 18 Ireland' and inside front cover 'IRELAND III'</p> <p>Work in Counties Wexford, Laois and Offaly.</p>	N.d. /...

Notebooks, B.1-B.171

I...	Observations start at '320'.	
B.19	'RMS 19 Ireland' and inside front cover 'R.M. Shackleton. J.C. Harper' Sections taken at Derrymore Glen, County Kerry.	N.d.
B.21	'RMS 21 Ireland (6)' Work in Counties Donegal and Mayo, March-April.	1947
B.22	'RMS 22 Ireland' Work in Counties Mayo and Donegal, July-August.	1947
B.23	'RMS 23 Ireland (8)' Work in County Donegal, March-May.	1948
B.24	'RMS 24 Ireland' and 'Donegal Sheets 17, 18. April 1949' Only a few pages at beginning and end of notebook used, for work in County Donegal.	1949
B.25	'RMS 25 Ireland' and inside front cover 'Ireland 1949' Work in Counties Waterford and Mayo, 1949, August 1950.	1949, 1950
B.26	'RMS 26 Ireland' and 'Ireland 1951, 1953, 1954' Work in Sperrin Mountains (County Derry) and County Donegal August 1951; County Donegal 1953, July 1954, August 1956, 1966.	1951-1966
B.28	'RMS 28 Fiji (1949) 1' and '[...] Navua Gorge' Work July-August.	1949

Notebooks, B.1-B.171

B.29	'RMS 29 Fiji (1949) 2' and '[...] Traverses from Namuamua [?] Suva - Tam[?avua]'	1949
	Work August.	
B.30	'RMS 30 Fiji (1949) 3' and 'Nuku trav[erse]. Wainikovu-Wainivad[...]. Namuamua-Sabata'	1949
	Work August.	
B.31	'RMS 31 Fiji (1949) 4'	1949
	Work around Namuamua, August. Includes expenses, lists of photographs taken.	
B.32	'RMS 32 Fiji (1949) 5' and 'Waibogi'	1949
	Work August.	
B.33	'RMS 33 Highland border'	1950-1951
	Sections from Stonehaven, Aberdeenshire, to River North Esk and area, 1950; work on Arran and Dunkeld, Perthshire, March-April 1951.	
B.34	'RMS 34'	1946
	Work in the Lleyn Peninsula, North Wales, the Lizard, Cornwall, and Sutherland.	
B.35	'RMS 35'	1947-1948
	Includes work in Aberdeenshire; Counties Donegal and Mayo, August 1947; Charnwood, Leicestershire, June 1948; Port-na-Blagh, County Donegal, September 1948.	
	At back is draft ?report of meeting.	
B.37	'37 Lleyn'	1950
	Work May.	/...

Notebooks, B.1-B.171

/...	Includes notes on specimens.	
B.38	'RMS 38 Ireland' Work in Counties Antrim and Donegal.	N.d.
B.39	'RMS 39 Scotland' Work in various locations in Scotland, August 1951, Easter 1952. Paginated, with list of contents at front.	1951-1952
B.41	'RMS 41 Kenya' and 'Nairobi District I' Work January-February, November.	1944
B.42	'RMS 42 Kenya' and 'Nairobi District II Sheet 51 (also Nyeri area, sheet 43)' Work October-November 1944, January 1945. Paginated with index at front.	1944, 1945
B.43	'RMS 43 Kenya' and 'Olorgesailie (1) 1946' Loose material intercalated includes Shackleton's personal notes on work done, work in hand and future plans. Olorgesailie was the name given to a group of Acheulean sites in Kenya.	1946
B.44	'RMS 44 Kenya' and 'Olorgesailie (2) 1946'	1946
B.45	'RMS 45 Kenya' and 'Kenya 1947. Magadi & S. of Ngong' Work December.	1947

Notebooks, B.1-B.171

B.47	<p>'RMS 47 Anglesey'</p> <p>Work in Anglesey December 1949; Liverpool Geological Society Easter vacation excursion 1951; January 1952; Easter vacation expedition March 1954; August 1955.</p>	1949-1955
B.48	<p>'RMS 48'</p> <p>Paginated with index at front.</p> <p>Work in Fiji, Hawaii, 1949; the UK (Arran, Anglesey etc), 1951-1952.</p>	1949, 1951-1952
B.49	<p>'RM Shackleton 49 Scotland'</p> <p>Paginated with index at front.</p> <p>Work in Stirlingshire (Ben Lui, Aberfoyle etc) and Perthshire (Dunkeld).</p>	1952-1953
B.50	<p>'RM Shackleton 50 N. Wales & Local'</p> <p>Paginated with index at front and loose notes intercalated at back of notebook.</p> <p>Work June-November 1952, May, August 1953.</p> <p>'Local' refers to Alderley Edge, Cheshire.</p>	1952, 1953
B.51	<p>'RM Shackleton 51 Morocco'</p> <p>Work September-October.</p>	1952
B.52	<p>'RMS 52'</p> <p>Work in Ayrshire (Girvan) and Dumfries and Galloway, April.</p> <p>See C.71.</p>	?1951
B.53	<p>'RMS 53 Ireland' and inside front cover 'Ireland (Donegal) 1953'</p>	1953 /...

Notebooks, B.1-B.171

- /... Work March-April.
- B.54 '54 Scotland' 1953, 1954
Paginated with index at front.
Work in Perthshire and southern Highlands, June 1953,
May 1954.
- B.55 '55 Fanad' and 'Notebook 55 Fanad Letterkenny and Malin Head' ?1954, 1956, 1957
Work in County Donegal.
- B.56 'Notebook 56 Scotland' 1954-1956
Paginated with index at front.
Includes work in the Highland border region, June 1954,
April 1955, April-May 1956.
- B.58 'Notebook 58 N. Wales Dam Sites' 1955x1965
Work at Dolanog, Tryweryn and other sites.
This work relates to Shackleton's consultancy in respect
of the Tryweryn Dam and Reservoir 1955-1965. See
section D.
- B.59 '59 Spain 1955' 1955
Paginated with list of contents at front.
Work in Asturias and the Pyrenees, July 1955.
- B.60 'Notebook 60 Anglesey' and inside front cover 'Field book 60. Anglesey March 1955' 1955
The initial entries are more in the form of an account than
the usual brief notes and sketches.

Notebooks, B.1-B.171

	Tibetan plateau.	
B.143	'143 Tibet 2 1985' Work June-July.	1985
B.144	'144 Tibet 1986' Work in eastern and southern Tibet, September.	1986
B.146	'146 Morocco 1983' Chiefly work in Taza, Fez and Chefchaouen areas, September.	1983
B.147	'147 Scotland Portugal 1985' Work in Ballachulish, Argyll, March 1985; Portugal, May 1985; Natal, South Africa, May 1995. At back is list of planned future geological work.	1985, 1995
B.148	'148 Ireland, Oman, Tanzania' and inside front cover 'Ireland 1988 Oman 1990 Tanzania 1990' Work in County Donegal April 1988; Oman, January 1990; Tanzania, August 1990. At back is draft article, possibly to accompany new edition of tectonic map of Africa.	1988, 1990
B.149-B.158	FIJI NOTEBOOKS	1935-1936

This sequence of numbered notebooks running from I to X, covers Shackleton's work in Fiji, November 1935-August 1936, as Chief Geologist to Whitehall Exploration Ltd. The notebooks bear considerable evidence of having been used in the field, with scribbled text and extensive water damage that has rendered many pages illegible. Some have had pages cut or torn out.

Notebooks, B.1-B.171

The sequence lacks notebook IX. It is hoped that this notebook will be located so a gap has been left in the catalogue accordingly.

B.149	'Fiji I'	1935-1936
	Used November 1935-January 1936. Locations 1-492.	
B.150	'Fiji II'	1936
	Used from January 1936. Locations 493-869.	
B.151	'Fiji III'	1936
	Locations 884-1133.	
B.152	'Fiji IV'	1936
	Locations 1138-1478.	
B.153	'Fiji V'	1936
	Used ca May. Locations 1496-1717.	
B.154	'Fiji VI'	1936
	Used ca June. Locations 1726-1845, 1892-2099, 3001-3[0]49. See B.155 for locations 1849-1891.	
B.155	'Fiji VII'	1935-1936
	At the front this notebook was used as a more formal record of work 21 December 1935-5 May 1936. Entries from June are more scrappy and record locations 1849-1891 and 3949-4047.	
B.156	'Fiji VIII'	1935, 1936
	Used at the front for notes November 1935, thereafter	

Notebooks, B.1-B.171

from August 1936 to record locations 4060-4373 (with later corrected numbering up to 4571).

B.158	'Fiji X'	1936
-------	----------	------

Used ca July-August. Locations 3850-4252 and 4578-4908.

B.159-B.167	UN-NUMBERED NOTEBOOKS	1929-1996, n.d.
--------------------	------------------------------	----------------------------

B.159	'South Africa Intl Geol. Congress 1929'	1929
-------	---	------

Pocket notebook used for record of travel to South Africa, notes of conference excursions, lists of specimens and photographs and accounts. July-August.

Shackleton attended the 15th International Geological Congress held in Pretoria, South Africa, while still an undergraduate.

B.160	'Miscellaneous I. S. Kavirondo March 1944. Gem Sept 1944 Kitere Dec 1944'	1944
-------	---	------

Softback field notebook used for work in Kenya, March-November.

B.161	'Sheet 44'	1945
-------	------------	------

Softback field notebook used for work in Kenya, February-March.

B.162	'Islay (1956)'	1956
-------	----------------	------

Loose leaf sketchbook, lacking original binding. Includes annotated map of section of Islay.

B.163	'Brittany Sept. 1972 Crozon area'	1972
-------	-----------------------------------	------

Lacks covers. Most pages missing.

Notebooks, B.1-B.171

B.164	Pocket notebook	?1970s
	Lacks covers. Used for work in Spain and Portugal.	
B.165	Conference notebook for 'The Fourth IGCP 348 (The Mozambique and related belts) Field Meeting in Ethiopia and Eritrea March 15-25, 1996'	1996
	Used for notes on proceedings and excursions.	
B.166	'R.M. Shackleton Specimens 1-[1949, original entry inked out]'	N.d.
	Used for recording specimens 500-1949, although many numbers have no specimen listed.	
B.167	Pages from notebooks found loose	1932, 1949, n.d.
B.168, B.169	S. MARCHANT'S NOTEBOOKS	1950
	Two notebooks used by S. Marchant for work in Connemara, County Galway, Ireland, July-September 1950.	
	Marchant was based in the Geology Department, University of Birmingham.	
B.168	Inscribed on first page 'Field Book I'	
	Paginated with detailed index on first and last pages. Continues in B.169.	
B.169	Notebook II	
	Paginated with detailed index on last page. Continues from B.168.	

Notebooks, B.1-B.171

B.170, B.171

INDEX

N.d.

B.170

Card index to field notebooks

This contains cards listing Shackleton's main sequence of field notebooks (B.1-B.148) in reverse chronological order. It includes entries for notebooks not found.

B.171

Lists of Shackleton's notebooks arranged by region or country

These lists do not record notebooks missing from the main sequence at B.1-B.148, so were probably compiled later than the card-index at B.170.

SECTION C	MAPS AND PHOTOGRAPHS, C.1-C.108	early 1930s- ?1984

Maps and photographs, C.1-C.108

- I...* Includes letter from C.D.R. Evans referring to Moel Hebog fossils donated to the Institute of Geological Sciences by Shackleton.
- C.8 Print-out of list of 'Cambrian and Ordovician fossils from the Moel Hebog area, Snowdonia, in the R.M. Shackleton Collection' by A.W.A. Rushton and S.P. Tunnicliff N.d.
- Incomplete, lacks pages 2-6. With manuscript note attached of 'Localities wanted'.
- C.9 'Hebog area Spare 6". WGF[earnside]'s Ffestiniog map'. Contents of Shackleton's envelope so inscribed N.d.

C.10-C.51

KENYA

During the Second World War Shackleton was seconded to the Kenyan Mining and Geological Department undertaking a strategic mineral survey. He surveyed widely throughout Kenya producing reports for the Geological Survey of Kenya on the areas of Malikisi, North Kavirondo (1944), Nyeri (1945, Report no 12), Migori Gold Belt (1946, Report no 10), and Nanyuki and Maralal (1946, Report no 11).

In 1942 the archaeologist Mary Leakey discovered human artefacts (mainly hand tools) at Olorgesailie, an Acheulean (lower Palaeolithic) site southwest of Nairobi. Between 1942 and 1947 Mary and L.S.B. Leakey excavated the site. Shackleton collaborated with the Leakeys' investigations by mapping the Olorgesailie site. He prepared a 1:10,000 scale coloured geological map of the area around the Olorgesailie site and a geological map of the area between Olorgesailie and Ngong (1:50,000 scale) for an archaeological conference in Nairobi organised by L.S.B. Leakey. These maps were only later published, in 1978.

The bulk of the maps presented here date from the 1930s and 1940s. The dates given refer to the date or approximate date of the creation/publication of the map rather than its use by Shackleton, although in many cases the two may be identical.

A few maps include other areas of East Africa.

C.52-C.107	GREAT BRITAIN AND IRELAND	1922-1956, n.d.
-------------------	----------------------------------	----------------------------

The bulk of this material, C.52-C.92, is the contents of Shackleton's envelopes of 6 inch (1:2,500) maps inscribed with the location or locations to which they refer. These have been presented in an alphabetical order by the location. In some cases, where the envelope bears more information, it has been retained. Loose 1 inch Ordnance Survey maps used by Shackleton are presented at C.97-C.107. Many are annotated.

These maps appear to have been used chiefly over the period from the late 1930s to the 1950s.

SECTION D

TRYWERYN DAM CONSULTANCY, D.1-D.20

1955-1966

In 1955 Liverpool Corporation announced its intention to build a reservoir near Bala in Merionethshire to ensure the city of Liverpool had a sufficient water supply. Despite many objections, as the reservoir would drown the village of Capel Celyn and a number of hill farms, Liverpool Corporation approved the plan in 1956 and an enabling Act of Parliament was passed the following year. Despite a continued opposition campaign, headed by Welsh Nationalists, the dam building went ahead and the reservoir was opened in October 1965. It had the capacity to hold 16,400 million gallons of water.

Shackleton advised Liverpool Corporation on the geology of the site.
