Deposited in the University College, London, Library 1981

INTRODUCTION

The material was received from Dr. J.M. Walshe (son) at various dates in the course of 1978, and includes research notes, drafts for articles and speeches, personal and scientific correspondence.

The documents were found by Dr. Walshe among the books in his father's library. Many of them were tucked inside the volumes and were written by or to the authors. Dr. Walshe has made a note at the head of the documents of the titles of the books in which they were found. He presented the books themselves to the Neurological Department, Addenbrooke's Hospital, Cambridge (textbooks and technical books) and to the library of the National Hospital, Queen Square, London (philosophical works); there is a note to this effect, where appropriate, on the documents.

As with the first supplementary list, the present supplement follows the sections of the main listing, and the items are numbered to be inserted into the sequence.

The opportunity has been taken to compile an index of correspondents in all three lists. This is on p. 5 of this supplement.
